## Portfolio investment philosophy and principles

### Long-term investors

Investing to generate long-term returns for our members so that they can achieve their best possible retirement outcomes. We look through transient volatility, always with an eye to exploiting shorter-term opportunities as they arise, provided the risk-reward trade-off is skewed in our favour.

### Diversification adds value

We focus on diversifying through investment managers to build risk-controlled and risk-aware portfolios, embracing risk efficiently where we believe it best delivers returns.

### Active management should be efficient

Active management can add value but must be optimised within an overall fee and risk budget framework to make every dollar count.

### Committed to a responsible and sustainable approach

For equities, environmental, social and governance (ESG) factors, such as climate change risks and opportunities, are long-term in nature and are key to delivering sustainable investment outcomes.

### Unlisted assets for Property investment option

Brighter Super strategically incorporates unlisted assets, which are assets not listed on an exchange, into its portfolio. Unlisted assets are a key part of Brighter Super's strategy and portfolio as they provide both income and capital appreciation, while also offering defensive characteristics that contribute to a more resilient investment strategy.

The inclusion of these unlisted assets leverages their potential for more stable and predictable returns, diversification benefits, reduced portfolio volatility, and inflation hedging properties.

To learn more about our approach to investing in unlisted assets, including our governance and valuation methodologies please refer to the *Brighter Super Fund Factsheet - Unlisted Assets* at [brightersuper.com.au/investments](https://brightersuper.com.au/investments).
