

This option may be suitable for investors seeking fairly stable returns. It is our lowest risk Ready-made Multi-manager option, however there may be occasional years where returns are negative. It invests mainly in defensive assets, with a small exposure to growth assets.

\* Returns are on the basis of daily unit pricing valuations, net of investment manager fees, net of taxes and gross of administration fees for all performance periods. Past performance is not an indicator of future performance.

1. Return target above the benchmark is over rolling 10-year periods after investment fees but before taxes. Investment markets are uncertain and future returns cannot be guaranteed.
2. Please refer to the Brighter Super *Product Disclosure Statement* and the *Investment and Fees Guide* at [brightersuper.com.au/pds-and-guides](https://brightersuper.com.au/pds-and-guides) for more information. Fees and costs can change from time to time. Includes 0.12% performance fee. Performance fees are included in the investment fees and costs for each investment option – they are not charged separately. Performance fees have been estimated by taking the average of the last five financial years. The actual amount charged in each financial year will depend on the performance of the options that have performance fee arrangements in place.

## Portfolio investment philosophy and principles

### Long-term investors

Investing to generate long-term returns for our members so that they can achieve their best possible retirement outcomes. We look through transient volatility, always with an eye to exploiting shorter-term opportunities as they arise, provided the risk-reward trade-off is skewed in our favour.

### Diversification adds value

We focus on genuinely diversified portfolios to build risk-controlled and risk-aware portfolios, embracing risk efficiently where we believe it best delivers returns.

### Asset allocation underpins returns

Strategic asset allocation is the key long-term driver of returns and is best achieved with a mix of public and private market assets, with prudent use of illiquid assets to produce superior risk-adjusted returns.

### Active management should be efficient

Active management can add value but must be optimised within an overall fee and risk budget framework to make every dollar count.

### Committed to a responsible and sustainable approach

Environmental, social and governance (ESG) factors, such as climate change risks and opportunities, are long-term in nature and are key to delivering sustainable investment outcomes.

Brighter Super's Ready-made Multi-manager options bring together the skill and expertise of our investment managers across Australia and the world. Strategic Asset Allocation (SAA) and investment managers for each asset class are listed in the table below.

### Unlisted Assets

Brighter Super strategically incorporates unlisted assets, including property, infrastructure, and private equity, into its portfolio construction process. These assets provide both income and capital appreciation, while also offering defensive characteristics that contribute to a more resilient investment strategy.

The inclusion of these assets aims to leverage their potential for higher returns, diversification benefits, reduced volatility, and inflation hedging properties. These considerations align with a sophisticated portfolio construction strategy designed to optimise risk-adjusted returns for investors.

Brighter Super adheres to a robust governance framework to effectively manage asset valuation risk. The Asset Valuation Policy outlines our approach, which is to ensure the fund's listed and unlisted assets are fairly and accurately valued.
